

Jan 2003: PAM Eradication Programme - Health Risks and Effects

January 2003: Painted Apple Moth Eradication Programme – Health Risk and Effects.

Meriel Watts, PhD. for the Stop Aerial Spraying (SAS) group. January 2003.

Paper addressing the adverse health effects experienced by the community exposed to the aerially applied insecticide Foray 48B. Compares the difference between health effects apparently experienced and the government's assessment of the health risk.
